Selected Projects

Analysis of customer data at Sprocket Central Pty Ltd. for future business recommendation

(This project was a part of virtual internship arranged by KPMG and Forage (Australia))

- o Data Quality Assessment (check missing/duplicate/incorrect values and clean/complete them for analysis)
- o Data Insights (Targeting high value customers based on customer demographics and other attributes)
- o Dashboard creation to present insights.

Fresh From Farm

- o Created a database management system to store information about farmers, their products (crops), and customers. Through this system farmers can sell their crops to the customers. The project is done in three different aspects: Relational Database (SQL), NoSQL (MongoDB) and Graph Model (Neo4j).
- o Performed data analysis to find significant insights and trends.

Land Use Classification using Satellite Image Dataset (group project)

- o Applied custom-built CNNs for land use classification.
- o Applied transfer learning to fine-tune pre-trained networks such as AlexNet and ResNet.
- o Performed extensive analysis for misclassified images per label, prediction accuracy per label etc.

Leadership Experience

Student Advisor, Asian University for Women.

Aug 2019 – Dec 2021

- o Besides teaching at AUW, I worked as a Student Advisor. As an advisor, I regularly monitored students' performance and helped them to develop individual study plans.
